

Early American Jetliners

The De Havilland Comet and Tupolev Tu-104 were the first to fly revenue services, but the airline industry did not change significantly until the Boeing 707, DC-8 and Convair 880 appeared. Suddenly hundreds of glorious propeller driven airliners became obsolete and all the worlds airlines rushed to buy the new jet engine technology. Watching the water injection-assisted take-off of one of the early Boeing 707s and DC-8s was an awesome spectacle, with smoke pouring from the turbojets and bomber-like noise. Sadly this era is long gone, and the classic American jetliners that were once so common at airports all over the world are now a distant memory. The author has represented all three of the classic American jetliners in this all 115 page colour photo book, with fabulous and unique colour photos taken mostly in the 1980s and 1990s, as these great airliners were nearing the end of their service lives. The ebook is a great look back at the twilight era of classic jet airliners, and you can conveniently carry it along on your ipad or mobile device for reading enjoyment at home or while on the road travelling.

Portland's Solar Equipment Installation Experts Referral SOLAR Save Money Help the Environment Gain Power Independence Learn About the Benefits of Solar Panels

"I had solar panels installed on my roof in July. Rob from Referral solar is very experienced and professional. He gave me recommendations based on my home and helped me choose from the different payment options based on my budget."

Judy C.

"I'm using zero net electricity and that feels wonderful. I've had the system up and running for two months now, and the results are better than I expected!"

Daniel M.

"I would highly recommend Referral Solar Portland to everyone! They installed solar panels at my home about a year ago. We've had rain since the install and no leaks to report. The energy we've been generating is consistent and clean. I couldn't be more pleased."

Martin C.
