

## Free Movement in European Community Law

Exploring the basic freedoms on which European Community law is based, this book is a well-organized treatment of a variety of types of legislation. Burrows divides the subject matter into five distinct sections, examining the free movement of goods, individuals, and capital, with particular attention to the role of the Customs Union, monopolies, and quantitative restrictions on free trade. The conclusion outlines the exceptions to each basic freedom and completes this detailed discussion of the wide range of issues which concern Community law.
