

## An Introduction to Land Law: Fourth Edition

Simon Gardner and Emily MacKenzie's *An Introduction to Land Law* has been widely acclaimed by students and teachers for the distinctively informative and stimulating way in which it addresses this challenging subject. Concise and highly readable, it covers the main points of land law found in the syllabuses of law schools in England and Wales. While not intended as a comprehensive textbook, it provides both sufficient detail and especially the illuminating overview needed for a real understanding, with many pointers for those seeking more. Most of all, it stands apart from other land law books in the model it offers of critical engagement with the material. As the authors say in their Preface: We aim not just to state the law, but to paint its portrait, or tell its story, or something of that kind. So we set out to offer a careful, thoughtful, honest and critical (but not unsympathetic) appraisal, from a number of directions, both doctrinal and contextual. Once again, too, we present the portrait or story partly for its own interest, but most of all so as to encourage readers to try something similar for themselves - to reflect on the subject more, and so understand it better, and at the same time deepen their thinking skills in general. As well as updating the book's overall coverage, this fourth edition features reworked discussions of areas where the law has recently undergone substantial change, and also where the authors' thoughts themselves have developed - including ownership, easements, and rectification of the land register. As one reader of the first edition commented, it shone light where none had shone before, and lit a clear path to understanding. [Subject: Property Law, English Law]

Portland's Solar Equipment Installation Experts Referral SOLAR Save Money Help the Environment Gain Power Independence Learn About the Benefits of Solar Panels

"I had solar panels installed on my roof in July. Rob from Referral solar is very experienced and professional. He gave me recommendations based on my home and helped me choose from the different payment options based on my budget."

Judy C.

"I'm using zero net electricity and that feels wonderful. I've had the system up and running for two months now, and the results are better than I expected!"

Daniel M.

"I would highly recommend Referral Solar Portland to everyone! They installed solar panels at my home about a year ago. We've had rain since the install and no leaks to report. The energy we've been generating is consistent and clean. I couldn't be more pleased."

Martin C.
