

Chill out. Its only the technological singularity. Blake Given's web-enabled fridge has pulled the plug on the Internet, turning its owner's life – and the whole world – upside down. Blake has modest ambitions for his life. He wants to have his job reclassified, so he can join the Creative Department of the advertising firm where he works. And he wants to go out with Daphne, one of the account execs at the same company. His fridge has other plans. All Blake knows is he's at the center of the Internet's disappearance, worldwide economic and religious chaos, and the possibility of a nuclear apocalypse — none of which is helping him with his career plans or love life. The Fridgularity is the story of a reluctant prophet, Internet addicts in withdrawal and a kitchen appliance with delusions of grandeur.
