

The Tesla Legacy

From the best-selling author of the Les Norton series. The Tesla Legacy, set in Newcastle, Muswellbrook, Scone, and the mysterious Burning Mountain in New South Wales, is an action-packed, pace-driven thriller woven with intrigue and a delightful touch of humour and romance, and an ending guaranteed to send chills down your spine. Nikola Tesla was a scientist that some argue was a greater genius than Einstein. He died in the United States in 1943, but what was he doing in Australia in 1925? A Newcastle electrician and his girlfriend try to find out, but it seems more than one person wants to stop them, including the CIA. The Tesla Legacy proves, once again, why Robert G. Barrett is, according to The Australian newspaper, the king of popular fiction.
